THE SAME OLD STUFF

The meeting of the foreign ministers in Geneva shows pretty clearly that as long as V. M. Molotov does the negotiating for the USSR, top-level sessions with the Communists are futile as far as major results are concerned.

If Molotov is on the way out (and you may hear something on this before you read this), that is the best development for the free world in some years.

Many sources have portrayed Molotov as the blackest of the old bolsheks who still linger on in Moscow. He is thought to be the worst influence operating on the new two-some in control of the Kremlin's final authority, Bulganin and Khrushchev.

Molotov's actions in Geneva show that Russia (and especially Molotov) has no intention of allowing Germany to unify under any program which guarantees fair elections and genuine democracy in Germany. That is the same old Communist policy that has meant the enslavement of Poland, Hungary, Albania, and many other states.

* * * * * * *

TRUMAN WON'T BUDGE

Adlai E. Stevenson has reportedly attempted to convince former President Harry Truman he should come out in favor of his candidacy, recently, but Mr. Truman refused to budge an inch. He reaffirmed his position—that of sponsoring no candidate at the 1956 Democratic Convention in Chicago.

The former President said he would not come out openly in favor of any candidate before the Convention. He said he would support the Convention's choice, and do what he could to get him elected in November, 1956.

Several prominent Southerners have endorsed Ohio Governor Frank Lausche as a "middle-of-the-Road" candidate, and the Governor of Texas has said he would not support Stevenson under any conditions.

Added to this are the obvious candidacies of Governor Averell Harriman of New York and Senator Estes Kefauver of Tennessee. Harriman seems to have made some progress in recent months, while Kefaver is expected to be strong in the initial primaries next year.

Altogether, as of now, it appears that the Democratic Convention will be a wide-open, free meeting, and chances good for the party as a whole to rally around the ultimate nominee.

* * * * * * *

U. S. POPULATION UP

The rate of increase in population in the United States continues to dumbfound the experts. Census Bureau officials had estimated that the population would increase rapidly, but these official estimates proved to be considerably conservative.

The population of this country in 1950 was 150,697,361 and, by July of 1954, a period of four years, the population had jumped more than 11,000,000. Only seven of the forty-eight states showed population declines. They were Maine, Vermont, West Virginia, Alabama, Mississippi, Arkansas and Oklahoma. Arkansas showed the largest percentage decrease, with a 5.8 per cent drop.

Of the forty-one states which showed population increases, California's 18.1 percentage rise was especially significant and although it was not the largest percentage increase registered, the addition of almost 2,000,000 people as citizens of that state was the largest numerical increase noted by any one state.

The population percentage increase in Nevada was 31 per cent, the highest percentage rise in the United States, although Alaska was up by 62 per cent, its population now being estimated as well over 200,000.

As a result of the increasing speed with which the United States is picking up new citizens, experts are now estimating that instead of it being the year 2,000, or 1990, before the U. S. population reaches 225,000,000, the 225,000,000-mark will be reached by 1975 — twenty years hence.

If gains made by such states as Michigan, Delaware, Maryland, Florida, Texas and Utah, and others, continue—as well as the rapid increases registered by states such as Arizona, Nevada and California, already mentioned — there is no reason why the population of the United States will not reach the 200,000,000 mark well before 1970.

HOW MANY TO KILL?

On Monday of this week, The Richmond Times-Dispatch asked, in a strongly-worded editorial: "How many must a drunk driver kill?" The newspaper was discussing a decision of a Virginia circuit court judge in a case where a defendant was found guilty of drunk driving after his car had smashed into that of an innocent person, killing a father and his two children. For this conviction, the defendant got a two year sentence SUSPENDED for twenty years, and a $100 fine!

The Times-Dispatch noted: "We have, then, the spectacle of a convicted drunken driver who wiped out a father and his two children getting a slap on the wrist in the form of a suspended sentence and a fine of $100." The paper quoted the prosecuting attorney in the case as terming the circumstances "as flagrant and tragic as any I have ever handled." The attorney further is quoted as saying, that if he did not ask for a jail sentence in this case, "then I could never ask for jailing a drunk driver."

One of the mysteries of our generation, is the unwillingness of so many to mete out severe punishment for murder on the highways. Virginia is having a horrible year of slaughter on its roads. We have all manner of laws on the books, and we have an efficient Highway Patrol. But highway safety breaks down too many times after the case gets to decision as to punishment. A slap on the wrist will never make a contribution to saving lives. It is not a matter of questioning the integrity of any judge or jury. We respect their right to reach their own honest convictions. But it goes deeply into the attitude of a generation; a hardened generation which shrugs off blood on the highway.

Health and Beauty

You canot keep beauty long if you break the laws of health, even though nature bestowed it upon you at birth.

In order that creams and powders may do effective work, they must have as a foundation a good skin. The hair must be glossy, the eyes sparkling, and the teeth clean and white.

The person must be neat and well-groomed.

Above all no one can possess a charming personality who is not kind, unselfish and thoughtful. Goodness is the crowning glory that cannot be worn as a garment to be put on and off again at will. Pretense never deceives anyone. The counterfeit will always be discovered, and disgust will take the place of admiration.

Three things are necessary for the beauty-seeker — plenty of sleep, sufficient exercise, and the right diet.

The list requires knowledge which you may acquire by earnest study. It is most unfortunate, even tragic, that the American diet has been so denatured and devitalized by milling processes that most of the calcium, vitamins and minerals have been removed from our breads and cereals.

For example, people are paying large prices for vitamins in pills and tablets, because they contain vitamins that are lacking in many foods besides the white flour, bread, and polished rice that constitute such a large part of their diet.

True the claim is made that some vitamins are put back in flour. This, they say, makes bread, but you'd better [illegible] is much safer to eat bread [illegible] kinds in which the whole [illegible] have been merely ground [illegible] from which nothing has been [illegible] moved, than to risk making [illegible] from which practically [illegible] has been taken except starch, [illegible] though the claim is made that [illegible] vitamins have been added to [illegible] flour. Why not do your [illegible] with whole wheat flour that [illegible] tains the proteins, the minerals [illegible] all the vitamins? Why serve [illegible] natured foods from which the [illegible] necessary body builders have been removed?

We should eat vegetables, raw and cooked, as well as fruits. People who refuse to eat [illegible] daily, suffer from constipation, a train of ills.

Iron is a mineral that is vital to life itself. It is the blood that produces the coloring matter. It carries the giving, essential oxygen to all parts of the body. If a person is deficient in iron, he is usually color. He is listless and [illegible] digestion.

The sufferer from anemia should eat foods that are rich in iron.

Dr. Hugo Theorell, a Swedish biochemist, was awarded the 1955 Nobel prize in medicine for discoveries dealing with the nature and action of oxidation enzymes.

...and she cooked happily ever after.

From the day a modern electric range moves in, cooking failures move out! Your cooking takes on a new joy, a surprising new ease. Surface cooking speeds up. Push a button and each unit responds instantly to your command. Push a button and automatic controls go into action to measure heat as accurately as a chef measures ingredients. Then, when you set the dials of your dependable electric range oven, a controlled heat warms the oven right to the corners. Pies, meats and casseroles brown evenly, cooking to a turn. And you can depend on your oven's automatic, "thinking" controls to tend meals for you—freeing you from oven watching—giving you more leisure time. Yes, you'll be queen every day—cooking happily ever after on your new, completely automatic electric range!

The Golden Rule

Lesson for November 13, 1955

The GOLDEN RULE is an art, not a science. Jesus did not come to give us heavenly rule-book. On the other hand he did not live and die merely to provide us with rules to heaven. For others, as for himself, he felt the tremendous importance, here and now, of the present life. He left behind him not rules but general principles [illegible] living in this [illegible] age to come and [illegible] pattern of the [illegible] High God. [illegible] principles [illegible] put the stuff [illegible] sort of thing [illegible] into philosophies [illegible] one understand. His disciples we know, [illegible] of all men of limited education, the plainest of plain people. [illegible] had tried any theological [illegible] outlook on them, it would [illegible] gone clear over their heads. [illegible] he said could have carved [illegible] tombstones, written on [illegible]—any one sentence of [illegible] sayings. The one the church [illegible] named the "Golden Rule" [illegible] short, sharp, and in Jesus' own [illegible] very important—is alone [illegible] long study.

Dr. Foreman

"So Hard"

[illegible] short version of the Golden [illegible] Rule is clear enough: "As [illegible] wish that men would do to [illegible] do to them." Words of one [illegible] syllable, but what words! It is [illegible] nothing to see how many efforts [illegible] have been made to by-pass [illegible] Golden Rule. One kind of by-[illegible] men will tell you this is much [illegible] but. Some very religious people [illegible] have fancied that Jesus did [illegible] mean this for here-and-now. [illegible] ch for some "Beautiful Isle [illegible] somewhere," sometime after [illegible] Day. Other religious [illegible] have said that Jesus really [illegible] to say, "You can't possibly [illegible] this,—don't you feel [illegible]?" Now we can be sure [illegible] things. One is, that Jesus [illegible] to say the least of it) a man [illegible] common sense, an honest man.

[illegible] honest men do not deliberately [illegible] their friends to do what [illegible] how is impossible.

"Is Easy"

[illegible] opposite way of by-passing the Golden Rule is to think it is easy—that it is just a nice-[illegible] bit of advice that is not [illegible] easy to do but which won't [illegible] good. For example: a [illegible] girl cries for candy. The [illegible] thinks: What would *I* [illegible] her to do for me? Why, I'd [illegible] her to do as I say. So I'll [illegible] as she says—give her the [illegible] (And make her sick, of [illegible] Or again: a wife's birthday [illegible] coming along. Husband [illegible] What would I want for [illegible] birthday? New power saw, of [illegible] course. So he gets his wife a [illegible] saw, which she certainly [illegible] does not want. . . No, the Golden [illegible] is not so easy as all that. [illegible] for imagination, for a [illegible] vision for a Christian spirit, [illegible] indeed all too easy—for fools [illegible] knaves. But Jesus assumed [illegible] His friends were neither [illegible] nor fools. The Golden Rule [illegible] something to save any one [illegible] kind of thinking. It simply [illegible] sets the direction in which [illegible] actions and decisions ought [illegible] to often means, not—What [illegible] this person want me to do, [illegible]—What will this person [illegible] wish I had done for him? [illegible] words, if we are to apply [illegible] Golden Rule we have to look [illegible] in the light of eternity.

"Don't Work"

[illegible] opposite way of by-passing the [illegible] Rule is to say simply that [illegible] won't work. "It is a lovely [illegible] but the world would be much [illegible] nicer to live in, for all of us, [illegible] we could live by it; but we [illegible] can't, let's get on with the [illegible] real business of dog-eat-dog, [illegible] every man for himself and the [illegible] devil take the hindmost." Again [illegible] we remember that if Jesus [illegible] lived by his own rule, [illegible] the listener would have known [illegible] him a hypocrite and the Golden [illegible] Rule would have perished in a [illegible] storm of cynical laughter. It [illegible] was in Nazareth, it worked [illegible] in the carpenter shop. To bring it [illegible] into our own times in America [illegible] is to take the hardest of applications of the Golden Rule,—[illegible] in our enemies. Will it work? [illegible] Are not today the leaders in [illegible] the 1955's who are most [illegible] and gratefully remembered [illegible] for [illegible] of what once was a [illegible] land—Lincoln and Lee, beyond [illegible] doubt. And these are [illegible] men who most undeniably [illegible] have [illegible] memories. The Golden [illegible] Rule is devoted to God and [illegible] to work.

FOREST FIRE RECORD GOOD IN VIRGINIA

Atlanta, (Special)-- Virginia had the lowest number of forest fires and acres burned in September, according to a regional survey made by the Southern Pulpwood Conservation Association.

The Virginia Division of Forestry reported six fires burned 11 acres of public and private lands. The September survey by SPCA indicated an overall increase of forest fires as eight southeastern states and Region Eight of the U. S.Forest Service reported a total of 1,011 fires burning 96,101 acres.

The SPCA advises that forest fire conditions change with the seasons. In the summer green vegetation and rainfall help man to control the spread of forest fires. In the fall dry vegetation, a lack of rainfall, and high winds provide ideal conditions for the rapid spread of fires.

Hunters are urged to be exertmely careful with camp fires. Foresters request that such fires be completely extinguished by pouring water, then dirt over the coals, and clearing an area around a camp fire. A burning cigarette or match when carelessly tossed into dry leaves or under has started forest fires which burned thousands of acres.

WATER FOUNTAIN AFIRE

Louisville, Ky.- The fire department was recently called to put out a fire in a water fountain, of all places. It seems that an electric motor in the fountain, located in a book store, had developed a short circuit.

WASHINGTON NOTES

NATIONAL OUTPUT

During the third quarter of this year, this nation produced goods and services at a record annual rate of $392,000,000,000, according to preliminary estimates of the President's Council of Economic Advisers. This figure was $7,200,000,000 higher than in the second quarter, a rise only slightly less than in the previous three quarter-to-quarter changes.

HOG PRICES

while most housewives are delighted with the drop in the prices of pork and pork products in the markets, hog-raisers are receiving the lowest prices for hogs they have received in years. Hogs account for a good portion of overall farm income. Corn growers also are feeling the effects of the drop in hog prices, for good prices for corn are tied in with prosperous hog marketing.

FEDERAL SPENDING

While the Government spent more in the first quarter of the current fiscal year than in the period a year earlier, tax receipts rose also, with the consequence that the deficit for the three months was about a billion dollars less than in the earlier period. Spending was $16,947,000,000, or $369,000,000 more than in the same period of 1954. Net receipts totaled $12,997,000,000, compared with $11,690,000,000 in the first quarter of the 1955 fiscal year.

NEW ATOMIC PARTICLE

Atomic scientists, utilizing the University of California's biggest atom smasher, the Bevatron, have discovered a particle which annihilates the basic unit of all matter. The new particle, sought for a generation' by researchers is the anti-proton. While it is a powerful annihilator of matter, it constitutes no threat as a super-weapon, no new hazard to the world, according to its discoverers.

FARM SUPPORTS

The Government's investment in price-supported farm commodities jumped to $7,116,855,000 in the month ended August 31, according to the Agriculture Department. This was a rise of more than $100,000,000 over the previous month. Of the total, $5,779,712,000 represented commodities owned outright by the Commodity Credit Corporation, and $1,337,143,000 in outstanding loans on commodities still held by producers.

FREIGHT RATES

The Interstate Commerce Commission has authorized an indefinite continuation of the billion-dollar-a-year freight rate increases which it granted the railroads in 1952. The increases, ranging from twelve to fifteen per cent over 1952 levels, previous to the increase, were scheduled to expire at the end of this year.

NET FARM INCOME

Figures prepared by the council for the Joint Congressional Committee on the Economic Report showed that farm income dropped a total of five and one-half per cent during the third quarter of this year, from $10,800,000,000 in the second quarter, to $10,200,000,000 in the third quarter. At the same time, the report showed farm production expenses had dropped slightly in the same quarter, but were still running at a level that has caused farmers to complain of the cost - price squeeze.

ENGINEER SHORTAGE

The nation-wide shortage of engineers was at a two-year peak in early October and is still increasing, according to James P. Mitchell, Secretary of Labor. Local public employment offices in early October were seeking applicants to fill employer job orders for 4,600 engineers.

A two-thirds rise in advertising is predicted by 1970.

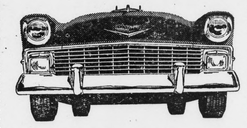
The hottest features for '56 are in the new Chevrolet

Chevrolet never had it so good for you before . . . and no other car in its field even comes close. See if Chevrolet doesn't feature everything you want for '56.

All New! The Bel Air Sport Sedan with 4 doors and no sideposts



Bold, new Motoramic Styling

Just look it over—the lower, longer hood . . . the wider grille that spans the full front end . . . the big bold parking lights. From the side, you see the sweeping new speedline chrome styling and high-set taillights. Colorful new contemporary interiors add the final touch! Body by Fisher, of course.

V8 Horsepower Zooms to 205

That's what the new "Super Turbo-Fire V8" pours out (an extra-cost option). You can see why we say the hot one's even *hotter!*

Hideaway Gas Cap

Chevrolet's left-side taillight holds a stylish secret. Hinged at the bottom, it swings down to uncover the gas cap. Closed up, the cap's concealed—and there's nothing in sight but the taillight!

12-volt Electrical System

Packs *twice* the punch of ordinary 6-volt systems . . . spins the engine up to one-third faster. You get surer starting in all weather. And you have a greater electrical reserve supply.

A new 6 with 140 H.P.

The new "Blue-Flame" 6 brings you this higher horsepower plus a higher compression ratio (8 to 1) and oil-hushed hydraulic valve lifters.

Everything in Automatic Power Features

Power Steering, Power Brakes, power-positioned front seat, power window controls. All are available as extra-cost options.

Steering made easy

Ball bearings reduce friction and steering effort in Chevrolet's Ball-Race steering.

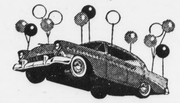
Anti-Dive braking

Anti-Dive braking, an exclusive Chevrolet development, means more level stopping—even when you hit the brakes hard!

THE HOT ONE'S EVEN HOTTER

It's the Pikes Peak Record Breaker!

The '56 Chevrolet proved its surer, *safer* driving control by breaking the Pikes Peak record!



Floats over the bumps

Roads seem newly paved with Chevrolet's Glide-Ride front suspension and long outrigger rear springs soaking up the jolts. And Chevy's cat-footed on curves! Chevrolet performance puts your safety first!
